

In order to use your carpet with first day look, you should take following instructions in consideration.

EVERYDAY USE

- The carpet should not be beaten during cleaning, it should rather be cleaned using a powerful vacuum cleaner preferably every day.
- The items (sofa, table, etc.) on the carpet can leave trace, to prevent it the location of the carpet or objects should be changed in certain intervals.
- Your carpet is produced with high quality cow leathers selected from South Africa. They are tanned very properly to increase durability. It is important choosing the highest quality leather and proper tanning process to make the carpet very durable and delay wear and tear. However using natural leather carpet in extremely high traffic areas may accelerate wear and tear.

STAIN REMOVAL

If something is spilled on your rug you must act quickly!

- Use a knife or a spoon to remove as much as possible of the excess spillage - always work from the edge of the stain towards the centre.
- Use a clean white cloth to dry the stain. Dab it with cold water.
- Pat the stain dry with a clean cloth – stain should be wiped in pile direction.
- Wait until the stained area is completely dry.
- Make sure nobody walks on the treated rug surface for at least the next 24 hours.
- Never use soap or detergents which have high chemicals substances.

DEEP CLEANING

- You should take support from professional dry cleaners. The company should be informed that high chemical detergents can harm the leather.
