

In order to use your carpet with first day look, you should take following instructions in consideration.

### **EVERYDAY USE**

- Your fur rug can be shaken off and gently vacuumed with the soft brush or brushless tips of the vacuum cleaner. When sweeping, please take care of sweeping in the direction of hair growing, not in the opposite direction. If needed, turn the carpet over and gently shake it to remove any dust or embedded particles that have accumulated in the post before vacuuming.
- The items that are heavy or have pointed-foot (sofa, table, etc.) on the carpet can leave trace, to prevent it, felt-like bumper can be used or the location of the carpet or objects should be changed in certain intervals. Excessive weight or pointed-foots can cause irreparable damage to the structure of the fur.

### **STAIN REMOVAL**

If something is spilled on your rug you must act quickly!

- Apply a tampon with a paper towel to excess spillage before the liquid is spreaded.
- The stained are should be wiped with a damp cloth after the buffer application. Any cleaning agents containing bleaching chemicals (such as bleach) should not be used.
- Wiping should be in a way that does not disperse the stain; circular and hard scrubbing should be avoided. Hard scrubbing while wiping may damage the structure of the natural fur.
- Make sure nobody walks on the treated rug surface until it is completely dry.

### **DEEP CLEANING**

- You should take support from professional dry cleaners. The company should be informed that high chemical detergents can harm the natural fur.
